Terms for international Sales

WE DO NOT ACCEPT CREDIT CARDS FOR PAYMENT

On all orders from international customers, a prepayment by bank wire transfer is required before shipping. The cost of the wire transfer is to be paid by the customer. If your bank deducts the cost of the wire transfer from the funds sent to us to pay for your order, we will have to send you another invoice to cover the short fall in your payment. This will delay the shipment of your order.

Upon acceptance of a purchase order from the international customer - Borrowman Electric Ltd. will email all required information for the wire transfer.

We also accept payments through Paypal – but we will have to add the Paypal service charge of 4% to your invoice total.

All shipping costs and customs/ duties when the goods enter your country are the responsibility of the customer. It is more efficient if the international customer has a brokerage company that can smooth the shipment through their customs.

We will do all necessary paperwork on our end for customs.

International shipments to customers using the courier of your choice.
Charges are collect on the international customer's account.

It is our policy on international shipments to over-pack all items to minimize the possibility of damage to the contents.

We take digital images during the packing and once the package is sealed. These pictures are included with the shipping/ customs papers and are also emailed to the customer when the shipment is given to the shipping company. This ensures that the customer and receiving customs office, knows the exact condition of the shipment when it has left our warehouse.

Harmonized Code 8537.10.39.92 - Programmable Controllers - Made in USA.
